ALLIED-LOCKE INDUSTRIES INC

ALWAYS REACHING FOR THE STAR

ALI Star of Quality

OUR LONG HISTORY

Allied-Locke Industries was founded in 1965 by Robert L. Crowson as Allied Chains, manufacturing chain for the agricultural market. Through a series of strategic acquisitions, including Moline Corporation in 1992 and Brewton Iron Works in 2007, Allied-Locke has grown to offer one of the broadest chain and sprocket selections in the world.

Allied-Locke currently includes five divisions:
Engineering Class Chain, Agricultural Chain,
Precision Roller Chain, Sprockets, and Environmental Products.

Our primary manufacturing facility in Dixon, Illinois covers nearly 600,000 square feet, with additional manufacturing facilities in Meridian, Mississippi and Brewton, Alabama. We also have warehouse facilities throughout the United States.

OUR CUTTING-EDGE TECHNOLOGY

Allied-Locke utilizes state-of-the-art equipment across all of our manufacturing processes. We continue to invest in capital equipment and have been recognized for our innovative use of robotics in improving automation and safety in the manufacturing process. Allied-Locke's manufacturing capabilities today prepare us to continue being a leading supplier in the global economy of tomorrow.

OUR PEOPLE

Allied-Locke is comprised of a group of experienced and dedicated employees, committed to customer satisfaction through excellence in quality and service – a commitment supported by our ISO9001 accreditation (Dixon, IL facility only). Our knowledgeable customer service and engineering staff is eager to assist you.
