MADE IN THE USA

ASPH 802

Webster steel bushed roller chains are specifically engineered for hot asphalt elevator scraping conveyors and made to the exacting standards you have come to expect from us. Our SBR (steel bushed roller) chains are designed to replace or retrofit original equipment chains used in hot asphalt elevating scraper conveyors. Close tolerances, heat-treated parts, alloy pins, and full length attachments make our SBR chains suitable for the rough and abrasive asphalt environment. The asphalt industry presents unique conditions which require superior materials and high quality chain construction. Webster chains are designed to service those harsh application requirements for maximum wear life and total customer satisfaction.

Webster's 125 year history continues to promote union labor and domestic materials with America made pride. Our in-house capabilities include: punch press operations, heat treat facilities, malleable iron foundry, sheet metal and fabrication departments, state-of-the-art machining centers, specialized assembly areas, and on-site testing and analytical capabilities. Webster's

300,000 square foot manufacturing facility has high production and job shop capabilities that make our standard products market competitive and gives us the ability to design specialty chains to suit your needs. Our ISO 9001: 2000 registered Quality Management System insures high quality consistent products, continuous improvements, competitive pricing, and the ultimate in customer service.

Webster also manufactures a wide

variety of products and chains to suit other asphalt industry applications which include: bucket elevator chains, drum drive chains, cast and steel buckets, cast iron and flame cut steel sprockets, and a full line of roller chains. Webster's asphalt industry expertise along with technologically advanced manufacturing processes and exemplary customer service, allows Webster to respond to any of your specific requirements.

STEEL BUSHED ROLLER CHAINS

For Hot Asphalt Elevating Scraper Conveyors

These SBR (steel bushed roller) chains are designed to replace original equipment chains used in hot asphalt elevating scraper conveyors. Close tolerance, heat-treated parts, and full length "K" and "M" style attachments make these SBR chains suitable for the rugged and abrasive environment in which they are used.

Chain Sidebars	Heat-treated medium carbon steel
Pins	Alloy steel, thru hardened and induction case hardened
Bushings	Alloy steel, case hardened
Rollers	Low carbon steel case hardened or heat treated medium carbon steel, as the application requires

Assembled with solid T-head cotters.

Webster Industries Quality Statement

Webster Industries, Inc. will provide superior value to its customers through quality products, continuous improvement, competitive pricing, and customer service.

A Challenge to Compare

Webster is as solid as its 125 years. With constant changes in other suppliers, domestic and abroad, you can always rely on Webster's USA made products to consistently provide you with precision quality products at competitive market prices.

Experience and Knowledge

For decades Webster has been a proven leader in the cement and aggregate material handling industries. Our experience and knowledge provide our customers with the ultimate in chain quality.

Quality and Precision in Chain Construction and Manufacturing

Webster provides only the highest standards in chain quality, backed by warranties, and over a century of successful product performance. Since 1998, Webster's ISO Registered Quality Management System recently recertified to ISO 9001:2000 insures consistent quality throughout our entire product line.

Dependability Guaranteed

Webster products are fully guaranteed and warranty information is available with each order. As with any Webster product our name is synonymous with quality and service.

On-Time Delivery

With three plants throughout the USA set up for stock and quick-custom processing, our emphasis is on fast turnaround time to prevent or reduce customer downtime and costs. Our 350,000+ feet of stock chains insures the highest customer satisfaction available.

Competitive Pricing on Stock and Custom Products

Consistent, competitive pricing is routine at Webster, because chain is Webster's specialty and primary product. Contact YOUR customer service representative for current price and availability.

Engineering and Technical Service Before and After the Order

Webster's engineering and technical staff specializes in chain designed for conveying systems. Our service is just as important after the order, as before. With over two centuries of combined inside sales experience, we know how to take care of customers.

Reliable and Knowledgeable National Distributor Network

Webster's national distributor network extensively covers the USA from coast to coast and is reputable and knowledgeable in material handling and power transmission products through years of supplying Webster chains and vibrating conveyors.
